

Challenge

- Add a new route `/contact` that returns the center's contact email and phone as a JSON object.
- Test it by visiting `http://localhost:3000/contact`.

Challenge

- Add a new route `/contact` in `routes/contact.js` that returns the center's contact info as JSON.
- Mount it in `app.js` at `/contact`.
- Test by visiting `http://localhost:3000/contact`.

Challenge

- Add a PATCH endpoint `/products/:id/inStock` to update only the `inStock` status of a product.
- Return `400 Bad Request` if the new status is missing or not a boolean.

Challenge

1. Add a `POST /transfer` endpoint allowing customers to transfer points to another account.
2. Validate:
 - Both `fromCustomerId` and `toCustomerId` must be valid UUIDs.
 - `points` must be a positive integer.
 - The sender must have enough points.
3. Return appropriate errors for each failure case.
